A raid on vagrants is threatened in Eureka. Since the days of '49 vagrants have been plentiful all over the Pacific Coast. Every town has its "dead beats," who refuse to work no matter what their surroundings nuisance the Legislature of this rather binding on the vagrant community, and in order that officers may understand their powers and duties under the law, and that the boys may comprehend the situation, we publish the following extract from the law: "Every person (except Indians) without visible means of living, who has the physical ability to work, and who does not, for the space of TEN DAYS, make proper inquiry for and use due diligence to seek employment, nor labor when employment is offered him; every healthy beggar who solicits alms as a business; every idle or dissolute person, or associate of known thieves, who wanders about the streets at late or unusual hours of the night, or lodges in any barn, shop, shed or out-house or other than such as is kept for lodging purposes, without permission of the owner or party entitled to the possession thereof; every person who frequents gambling houses, not being employed therein as an attache; "check guerrilla," that is, one who frequents gambling rooms and solicits money or the checks used therein to represent money, from the proprietors. by-standers, or betters, and has no other means of living other than the money obtained thereby; every lewd and dissolute male person who lives in and about houses of ill-fame, and every common drunkard, is a vagrant, and punishable by imprisonment in the County Jail not exceeding ninety days."

SILVER IN LIEU OF FRACTIONAL CURRENCY.-A Washington dispatch the last of June (the end of the present fiscal year) there will be about pully houses, however, and it is desir million dellars in silver coup in six million dollars in silver com in the Treasury, and that by the 1st of September there will be fully ten millions. With this amount it is believed that the Secretary will feel that he can safely begin to put into operation the law anthorizing coin to be paid out and fractional currency withdrawn.

A little girl at school read thus: "The widow lived on a small limbacy left her by a relative" "What did you call that word?" asked the teacher: "the word is legacy, not limbacy."
"But" said the little girl, my sister says a must say limb, not leg.

Like us all, they too are but mortal. Mr. Beecher has the neuralgia; Mis. Beecher is afflicted with nervous prostration; Mr. Fullerton has attacks bi vertigo, and Mrs. Tilton is John suncerand, troubled with headache. At best the whole scandal is but a sickly affair.

Parmensas Mix, the Gallatin. Tenn., humorist, has noticed that the larmers of this country, when they are about to go to ruin, usually take the owe-for land route.

What can be more exasperating to tha long-suffering sont of him who is "next" than to see the barber of his choice putting on his cost and starting for damey?

"Better go alone than to bad com pany." Some who zo a one are always in bad come and

It is a very significant fact that the Secration of pipers maintain a dogment in this section of country. They always have a good word for the foot-hills facing the Sacramento valley from both the Sierra Nevada and Coast ranges; they invite the attention of the public to the resour-ces and general advantages of Lake, Butte. Tehama and in fact all of the counties north and east of San Fran cisco, but they have no place in their columns for Lassen and Modoe which possess natural advantages vastly above them all. The Record-Union is justly indignant at the course taken by runners for the Southern counties among the immigrants, and might be. To put a check upon the points to the merits of Central and nuisance the Legislature of this Northern California, but is very State, has enacted a law, which is this section out altogether. Our Our country is neither unknown to them nor unfavorably known, for parties from that city have been here this Spring heeled with scores of applications to gobble up our lands, and of course not without a motive. Are they are in the course of the course they afraid that our vast acreage of rich soil, our great water facilities and our unequaled forests of timber will attract the attention of capitalists to such an extent that a rival railroad will be at length extended across the Sierras in this direction; Here, we believe, hesthe great secret The Central Pacific Railroad Company has lands and timber of its own to dispose of, and travelers from the East to any other portion of the State must traverse almost the entire length of that railroad. But they may revel in their silence; cap ital is surely coming here, dirt is already being removed to give way for the waters of Eagle Lake to rechim our sage lands, and engineers will commence the survey of a railroad from the Truckee river to this place in a few days. Nor do we believe this place will be its terminus, for the great belt of timber lying west and south of us being more extensive and of a better quality than in any other locality will give use to an industry that soon will force the line through to the Sacramento valley .- Susanville Advocate.

SIMIFICANT

MIRIGE IN UTAH .- On the 25th ult. mirage was observed about twenty miles north of Corinne, Utah, on the line of the stage road. At 2 o'clock cleven inverted, elongated houses were noticeable, and it a faw moments after, in addition, there was a string of wagons two or three hundred yards in length. Everything was as plain as though the observers were looking at the natural objects them-selves at a distance of about two miles, and the objects seemed to be suspended about one hundred feet from the surface of the earth. A mile says the rapid increase of silver coin-it was more plainly discernible than age within a short time causes some from the city, and those who saw it Treasury officers to think that the state that there seemed to be a body Secretary will begin paying out sil- of water, similar to Salt Lake, a few ver in lieu of fractional currency be- far as the eye could reach, and flankfore the meeting of Congress in De-jed on both the eastern and western comber next. It is estimated that by sides by the mountain ranges. Various objects were discernible, princi-
